AI-Powered Data Analytics Masterclass

Slide-Wise AI Prompt Playbook — Live Case Study: Bata Sales Data

Ready-to-copy-paste prompts for every slide, mapped to a real 2-hour delivery flow

TRAINER Shalini Ma'am — Corporate Trainer | Data Analyst | AI Mentor	**BRAND** @MissAlpha_532 · "Hello Champs!"
DURATION 120 minutes (30 slides)	**DATASET** Bata_Sales_Data.csv (~4,300 rows)

About the Live Case-Study Dataset

A ready-to-use synthetic Bata sales dataset (Bata_Sales_Data.csv) is provided alongside this playbook — share it with students before Slide 8. It's built to make every cleaning/debugging prompt in this script actually find something real.

Columns

- Order_ID — unique order reference
- Date — Jan 1 to Jun 30, 2026
- Region — North / South / East / West
- City — 16 Indian cities across the 4 regions
- Store_Type — Retail Store / Bata.in Online / Franchise Store
- Product_Category — Men Formal, Men Casual, Men Sports, Women Casual, Women Sandals, Kids Footwear, Accessories
- MRP, Discount_%, Units_Sold, Revenue
- Customer_Age_Group, Payment_Mode

Built-in data quality issues (for the Slide 12 & 18 prompts)

- ~25 duplicate Order_ID rows
- Missing values in Customer_Age_Group (40 rows) and Revenue (15 rows)
- Inconsistent text case in City and Payment_Mode
- 8 inflated Revenue outlier rows
- Real seasonality: higher sales in January, April-May, and weekends — so the Slide 16 forecast prompt has a genuine trend to find

Session Flow (same 120-min structure)

Block	Slides	Time
1. Foundations	1–7	**27 min**
2. Prompting & Setup	8–10	**11 min**
3. Live Hands-On Demo (on Bata data)	11–20	**40 min**
4. Career & Monetization	21–27	**26 min**
5. Action & Close	28–30	**12 min**

Slide-by-Slide AI Prompt Playbook

SLIDE 1 Title / Welcome	**3 min** (cum. 3 min)

AI PROMPT (copy-paste)

Warm-up (optional, verbal — no AI needed): ask 2 students "What's one decision you think Bata could make better with data?" to prime the room.

PRACTICAL APPROACH

No AI tool needed yet. Introduce today's running case study: Bata's Q1–Q2 2026 India sales data. Tell students the file will be shared in Slide 8/11 — everything from here builds toward one live dashboard.

MissAlpha™ AI Labs

SLIDE 2 What Is Data Analytics? — 4 min (cum. 7 min)

AI PROMPT (copy-paste)

> Act as a retail data analyst. Explain the difference between structured and unstructured data using a footwear retailer like Bata as the example — give one example of structured data (e.g. POS sales records) and one example of unstructured data (e.g. customer reviews or social media comments) specific to a shoe retail business.

PRACTICAL APPROACH

Type this into the AI tool live, screen-share the response. Map the AI's two examples back to Bata's real world: POS system = structured, Instagram/Google reviews about shoe comfort = unstructured.

SLIDE 3 Why Data Analytics Is In-Demand — 4 min (cum. 11 min)

AI PROMPT (copy-paste)

> List 5 real business decisions a footwear retail chain like Bata could make better using data analytics — one each for: inventory planning, pricing/ discounting, marketing spend, new store location, and customer retention.

PRACTICAL APPROACH

Run once, read the 5 answers aloud, and ask the room to vote which one they'd want to solve first — this becomes a running thread for the rest of class.

SLIDE 4 Traditional vs. AI-Powered Analytics — 4 min (cum. 15 min)

AI PROMPT (copy-paste)

> Compare how a Bata regional sales manager would traditionally build a monthly sales report in Excel (manual pivot tables, formulas, formatting) versus using an AI assistant to do the same task. Give an estimated time comparison.

PRACTICAL APPROACH

Show the AI's time-comparison answer as a visual hook — this is the 'why AI matters' moment. Emphasize the AI still needs a human to validate numbers and choose what matters.

SLIDE 5 The Complete Data Analytics Lifecycle — 4 min (cum. 19 min)

AI PROMPT (copy-paste)

> Map a Bata sales-data analysis project onto these 7 stages: Business Requirement, Dataset, Cleaning, Analysis, Dashboard, Presentation, Decision. Give one line of what happens at each stage specifically for Bata.

PRACTICAL APPROACH

Use the AI's 7-line answer as your live checklist for the rest of the masterclass — literally tick off each stage as you complete it in Slides 11–20.

SLIDE 6 Top AI Tools for Data Analytics — 4 min (cum. 23 min)

AI PROMPT (copy-paste)

MISSALPHA AI LABS™

I have a 4,300-row Bata retail sales CSV with sales, discount, and region columns. Should I analyze it with ChatGPT, Claude, Excel Copilot, or Power BI? Give pros and cons of each for a beginner analyst.

PRACTICAL APPROACH

Quick tool-selection demo. Let students see that for this masterclass, an AI chat assistant + spreadsheet combo is the fastest path — no coding needed.

SLIDE 7 How AI Empowers Data Analysts	4 min (cum. 27 min)

AI PROMPT (copy-paste)

For a Bata sales dataset, give me one example prompt I could use AI for in each of these 6 areas: data cleaning, chart generation, Excel formula writing, SQL/Python code, business insight discovery, and executive presentation writing.

PRACTICAL APPROACH

Read the 6 example prompts aloud — tell students these are literally the prompts they'll run for real in the next 40 minutes.

SLIDE 8 Real-World Project: Bata Sales Dashboard	3 min (cum. 30 min)

AI PROMPT (copy-paste)

Act as a senior data analyst. I'm about to share Bata's Q1–Q2 2026 India sales dataset (Order_ID, Date, Region, City, Store_Type, Product_Category, MRP, Discount_%, Units_Sold, Revenue, Customer_Age_Group, Payment_Mode — ~4,300 rows). Before I upload it, tell me what kinds of business questions this kind of dataset can typically answer.

PRACTICAL APPROACH

Share the Bata_Sales_Data.csv file with every student now (WhatsApp/email/drive link). Run this prompt as a primer before uploading — it sets expectations for the live build.

SLIDE 9 Prompt Engineering for Data Analytics	5 min (cum. 35 min)

AI PROMPT (copy-paste)

Role: Act as a senior retail data analyst.
Goal + Dataset: Analyze this Bata sales dataset to identify revenue and demand trends across regions and product categories.
Business Context + KPIs: Focus on total revenue, units sold, average discount %, and revenue by Region and Product_Category.
Output: Build a dashboard summary with 5 charts and 3 strategic recommendations for the Bata regional sales team.

PRACTICAL APPROACH

Build this 4-part prompt live on screen, piece by piece, explaining each part as you type it. This exact prompt becomes the master prompt you'll actually run in Slide 11.

SLIDE 10 Live Activity: Let's Analyze Data with AI	3 min (cum. 38 min)

MISSALPHA AI Labs

AI PROMPT (copy-paste)

(No new prompt — confirm setup) Everyone: open Bata_Sales_Data.csv + your AI assistant tab + Excel/Sheets, ready to run the master prompt from Slide 9.

PRACTICAL APPROACH

30-second tech check. Confirm every student has the CSV file open before proceeding — the next 10 slides depend on it.

SLIDE 11 Upload Your Dataset	4 min (cum. 42 min)

AI PROMPT (copy-paste)

[Upload Bata_Sales_Data.csv]
Describe the structure of this Bata sales dataset: list all columns and their data types, the date range covered, total number of records, and any initial data quality issues you notice at first glance.

PRACTICAL APPROACH

Live demo: upload the CSV into the AI tool, run this prompt, and read the AI's structural summary aloud. Confirm it correctly spots the ~4,300 rows and Jan–Jun 2026 date range.

SLIDE 12 AI-Powered Data Cleaning	4 min (cum. 46 min)

AI PROMPT (copy-paste)

Act as a senior data analyst. Clean this Bata sales dataset:
1) Remove duplicate Order_ID records.
2) Handle missing values in Customer_Age_Group and Revenue.
3) Standardize City name capitalization and Payment_Mode text case.
4) Flag Revenue values that look like outliers.
List everything you changed, with row counts for each fix.

PRACTICAL APPROACH

Run live. This dataset has intentional duplicates, missing Age Group/Revenue values, inconsistent City/Payment_Mode casing, and inflated outlier rows — the AI should catch all four issue types. Read the fix summary aloud.

SLIDE 13 Generate Charts Automatically	5 min (cum. 51 min)

AI PROMPT (copy-paste)

Recommend and generate the best chart types for this Bata dataset to show:
1) Monthly revenue trend, Jan–Jun 2026
2) Revenue by Product_Category
3) Revenue share by Region
4) Store_Type performance comparison (Retail vs Online vs Franchise)
Explain briefly why each chart type fits its data.

PRACTICAL APPROACH

Run live, screen-share each chart as it's generated. Pause on the Product_Category chart — ask students to guess the top category before revealing it.

SLIDE 14 Build a Dashboard in Minutes	5 min (cum. 56 min)

AI PROMPT (copy-paste)

MISSALPHA AI Labs

Design a one-page Bata Sales Dashboard layout with 4 KPI cards (Total Revenue, Total Units Sold, Average Discount %, Top-Performing Region) and 3 supporting charts (revenue trend, category mix, region split). Describe the layout in a way I can recreate it in Power BI or Excel.

PRACTICAL APPROACH

Run live and rebuild the suggested layout in Excel/Power BI on screen in real time, or paste the AI's KPI numbers into a simple Excel KPI-card layout if time is short.

SLIDE 15 AI Business Insights	**5 min** (cum. 61 min)

AI PROMPT (copy-paste)

Based on this cleaned Bata sales dataset, answer:
1) What happened? (key sales trends, Jan–Jun 2026)
2) Why did it happen? (root causes — discounting, region, category mix)
3) What's next? (forward-looking signal for Q3 2026)
4) What should we do? (3 ranked, actionable recommendations)

PRACTICAL APPROACH

Run live, read all four answers aloud, and connect each to a real Bata business decision (e.g. discount strategy, regional stock allocation).

SLIDE 16 Predict Future Sales — Forecast Intelligence	**4 min** (cum. 65 min)

AI PROMPT (copy-paste)

Using the Jan–Jun 2026 monthly revenue trend in this dataset, forecast Bata's Q3 2026 (Jul–Sep) revenue. Identify the growth trend, any seasonality (festive season, monsoon impact on footwear demand), and give a best-case and worst-case range.

PRACTICAL APPROACH

Run live and note the forecast number — you'll compare it against student guesses in the next slide's activity.

SLIDE 17 Interactive Activity: Human vs. AI	**7 min** (cum. 72 min)

AI PROMPT (copy-paste)

(Reuse the Slide 16 forecast) Students first write their own Q3 2026 revenue guess based on the Jan–Jun trend chart, then compare it to the AI's forecast and confidence range.

PRACTICAL APPROACH

Give students 90 seconds to write their own Q3 estimate in chat/on paper looking only at the revenue trend chart from Slide 13. Reveal the AI forecast from Slide 16. Discuss the gap — did the AI catch seasonality (monsoon dip, festive bump) that students missed?

SLIDE 18 AI Debugging: Fix Data Problems Instantly	**4 min** (cum. 76 min)

AI PROMPT (copy-paste)

Audit this Bata dashboard's data and calculations for errors:
- Check for any remaining duplicate Order_IDs

MISSALPHA AI Labs

- Check Revenue = MRP × Units_Sold × (1 − Discount_%) for mismatches
- Flag mismatched or inconsistent Region/City labels
- Recommend a better chart type anywhere the current one is a weak fit
List every issue found with row/column references.

PRACTICAL APPROACH

Run live — this reinforces that even a 'cleaned' dataset needs a second audit pass before it's presentation-ready. Discuss one real flagged issue with the class.

SLIDE 19 Dashboard Quality Checklist	3 min (cum. 79 min)

AI PROMPT (copy-paste)

Evaluate my Bata sales dashboard against these 5 criteria: Accuracy, Visualization, Readability, Performance, and Storytelling. Score each 1–5 with a one-line reason, and suggest the single highest-impact fix.

PRACTICAL APPROACH

Run live against the dashboard you've built through Slides 12–14. Share the scorecard — this becomes a reusable prompt students can run on any future dashboard.

SLIDE 20 Live Dashboard: Completed	3 min (cum. 82 min)

AI PROMPT (copy-paste)

Suggest 3 improvements to make this Bata dashboard more executive-ready for a regional sales review meeting — focus on clarity and decision-speed, not decoration.

PRACTICAL APPROACH

Screen-share the finished dashboard next to the original messy CSV for visual contrast — this is the 'wow' reveal moment of the session.

SLIDE 21 Data Analytics Career Roadmap	4 min (cum. 86 min)

AI PROMPT (copy-paste)

Based on what I just built with the Bata dataset (cleaning, charts, dashboard, insights, forecast), which of these 5 skills — Excel, SQL, Power BI, Python, Machine Learning — should I strengthen first, and why?

PRACTICAL APPROACH

Optional: have 2-3 students run this on their own profile/skill level and share the AI's suggested next step.

SLIDE 22 Top 5 Portfolio Projects	4 min (cum. 90 min)

AI PROMPT (copy-paste)

Rewrite my Bata Sales Dashboard project as a portfolio case study for LinkedIn/GitHub — include the business problem, my approach, tools used, and the business impact, in under 150 words.

PRACTICAL APPROACH

Run live once as a template, then assign as homework: every student personalizes and posts their own version this week.

MissAlpha AI Labs

SLIDE 23 Freelancing Roadmap	4 min (cum. 94 min)

AI PROMPT (copy-paste)

```
Write a short Fiverr/Upwork gig description offering 'retail sales dashboard and AI-powered insights' as a service, using my Bata project as proof of skill.
```

PRACTICAL APPROACH

Show the AI-generated gig description as a ready-to-post template — this is the direct bridge from classroom skill to freelance income.

SLIDE 24 The AI Analyst Workflow	3 min (cum. 97 min)

AI PROMPT (copy-paste)

```
Summarize, in 7 short steps, the exact workflow I just followed with the Bata dataset today — from business requirement to decision.
```

PRACTICAL APPROACH

Quick recall/consolidation — run this live and compare the AI's 7-step summary to the framework from Slide 5.

SLIDE 25 Monetize Your Skills	4 min (cum. 101 min)

AI PROMPT (copy-paste)

```
Write a 3-line pitch message I could send to a small retail shop owner offering to build them a Bata-style sales dashboard for their business.
```

PRACTICAL APPROACH

Run live, then have each student personalize the pitch for a business type of their choice as a 90-day goal exercise.

SLIDE 26 Building Your AI-Powered Team	3 min (cum. 104 min)

AI PROMPT (copy-paste)

```
If I were leading a small analytics team to deliver this Bata project, which of these 6 roles would matter most in the first month — Business Analyst, Data Analyst, SQL Expert, Python Expert, Visualization Expert, or Analytics Manager — and why?
```

PRACTICAL APPROACH

Discussion prompt — ask students which role they personally identify with most based on today's session.

SLIDE 27 Top 5 AI Techniques for Analysts	4 min (cum. 108 min)

AI PROMPT (copy-paste)

```
[Upload a screenshot of the revenue-trend chart from Slide 13] Interpret this chart in 3 bullet points for a non-technical Bata store manager.
```

PRACTICAL APPROACH

MISSALPHA AI LABS TM

Live mini-demo of the 'Screenshot → Insights' technique — fast, visual, and memorable as the closing technique demo.

SLIDE 28 The 7-Day Analytics Challenge	4 min (cum. 112 min)

AI PROMPT (copy-paste)

```
Give me a 7-day, one-task-per-day plan to practice everything I learned today using the Bata_Sales_Data.csv file, ending with a published portfolio-ready dashboard on Day 7.
```

PRACTICAL APPROACH

Run live as a template, then have every student commit publicly in the WhatsApp community: 'I commit to the 7-Day Challenge using the Bata dataset, starting [date].'

SLIDE 29 Your Free Resource Stack	3 min (cum. 115 min)

AI PROMPT (copy-paste)

```
(No prompt needed) Share the free resource list — Kaggle, Google Dataset Search, Excel, Power BI, Google Colab, GitHub, LinkedIn, ChatGPT, Claude, Perplexity.
```

PRACTICAL APPROACH

Share this list plus the Bata_Sales_Data.csv file itself as a single WhatsApp/PDF handout right after class.

SLIDE 30 Closing — From Raw Data to Business Impact	5 min (cum. 120 min)

AI PROMPT (copy-paste)

```
Summarize everything I built today with the Bata sales dataset into a 5-line project description I can add to my resume.
```

PRACTICAL APPROACH

Run live as the final act. Open the floor for Q&A, then close with the WhatsApp CTA, Campus Ambassador Program link, certificate mention, and next masterclass date.

Bonus: The Full Prompt Chain (Slides 11-20 in sequence)

Run these 8 prompts in order against Bata_Sales_Data.csv for a complete, uninterrupted live build — this is your backup script if you want to move fast without pausing on each slide.

- 1. Structure check (Slide 11)
- 2. Clean the data (Slide 12)
- 3. Generate 4 charts (Slide 13)
- 4. Build the dashboard layout (Slide 14)
- 5. Extract 4-question insights (Slide 15)
- 6. Forecast Q3 2026 (Slide 16)
- 7. Audit for errors (Slide 18)
- 8. Score against the 5-point checklist (Slide 19)

Each numbered prompt text is exactly as written in its slide card above — just run them back-to-back in the same AI chat thread so context carries over between steps.
