

MASTERCLASS - 7

PROMPT KIT

AI NAVIGATOR

By MissAlpha™ AI Labs

Learn | Build | Grow

PRACTICAL ACTIVITY 1

PROMPT ENGINEERING CHALLENGE

Weak Prompt → Professional Prompt → Production-Ready Output

Objective:
Learn how to transform an ordinary prompt into a professional, structured prompt using:

ROLE + GOAL + CONTEXT + CONSTRAINTS + OUTPUT FORMAT + EXAMPLES

Your Mission

Create an AI-powered resume improvement assistant for a student/fresher.

You may replace this with:

- **Interview preparation**
- **LinkedIn optimization**
- **Cover-letter creation**
- **Project explanation**
- **Study planning**
- **Content creation**
- **Job-search strategy**

MissAlpha TM AI Labs

STEP 1 — Write a Weak Prompt

Prompt 1A — Basic Prompt

Copy and paste this into ChatGPT / Claude / Gemini:

Improve my resume.

Record Your Observation

Was the response specific to your career goal?

☐ **Yes**
☐ **No**

Was the response personalized?

☐ **Yes**
☐ **No**

Did the AI know the job role I wanted?

☐ **Yes**
☐ **No**

Did the AI know my experience level?

☐ **Yes**
☐ **No**

What was missing?

MissAlpha™ AI Labs

STEP 2 — Upgrade the Prompt

Now apply the professional framework.

Prompt 1B — Professional Prompt

Act as a senior technical recruiter and ATS resume specialist.

GOAL:

Review and improve my resume so that it is better aligned with the job role I am targeting.

CONTEXT:

I am a [fresher / student / professional] applying for a [JOB ROLE] position.

My key skills are:

[LIST YOUR SKILLS]

My experience/projects include:

[PASTE EXPERIENCE OR PROJECT DETAILS]

The target job description is:

[PASTE JOB DESCRIPTION]

MissAlpha™ AI Labs

CONSTRAINTS:

1. Do not invent any experience, skills, certifications, achievements, or technologies.

2. Keep all recommendations realistic and relevant to my actual background.

3. Prioritize ATS-friendly keywords from the job description.

4. Keep the language professional and concise.

5. Identify weak or generic statements and explain how to improve them.

OUTPUT FORMAT:

1. ATS Compatibility Assessment

2. Top 5 Problems in My Resume

3. Missing or Weak Keywords

4. Section-by-Section Improvements

5. Improved Professional Summary

6. Improved Project/Experience Bullet Points

7. Recommended Skills Section

MissAlpha™ AI Labs

8. Final Action Checklist

Before making changes, briefly explain the most important issues you found.

STEP 3 — Compare the Results

Evaluation Area	Weak Prompt	Professional Prompt
Context	_____	_____
Personalization	_____	_____
Accuracy	_____	_____
Structure	_____	_____
Actionability	_____	_____
Output Quality	_____	_____

MissAlpha™ AI Labs

STEP 4 — FINAL ITERATION

Now ask the AI to improve its own response.

Prompt 1C — Self-Improvement Prompt

Review the response you just generated.

Act as a quality-control expert.

Identify:

1. Any assumptions you made.

2. Any generic recommendations.

3. Any missing information.

4. Any recommendations that may not be realistic for my profile.

5. Any important ATS or recruiter considerations that were missed.

Then produce a revised final version.

Do not invent information.

Make the final output practical enough for me to implement immediately.

MissAlpha™ AI Labs

Activity 1 Completion Checklist

☐ **I tested a weak prompt.**
☐ **I identified missing context.**
☐ **I used Role.**
☐ **I used Goal.**
☐ **I added Context.**
☐ **I added Constraints.**
☐ **I specified Output Format.**
☐ **I compared two AI outputs.**
☐ **I iterated my prompt.**
☐ **I produced a better final result.**

SCORE YOURSELF

Before: ★ __ / 10

After: ★ __ / 10

Improvement: ★ __ / 1

Write a LinkedIn post about learning AI.'

Vs

'Act as a career coach. Write a LinkedIn post announcing that I completed an AI masterclass, for an audience of college students and freshers, in a confident and friendly tone, under 100 words, formatted with 3 short paragraphs and 1 relevant hashtag at the end.'

MissAlpha™ AI Labs

PRACTICAL ACTIVITY 2

BUILD YOUR FIRST AI ASSISTANT

From Prompt → Workflow → Reusable AI Assistant

This activity moves you from AI User → AI Builder. It follows the MasterClass roadmap of choosing a real problem, writing a structured prompt, testing/iterating, and deploying a reusable assistant.

🎯 Your Mission

Build a personal AI Career Assistant that can help you prepare for a target job.

The assistant should be able to:

Understand → Analyze → Recommend → Generate → Improve

STEP 1 — DEFINE THE PROBLEM

Complete the following:

My Target Job Role

Job Role:

My Experience Level

MissAlpha TM AI Labs

☐ **Student**
☐ **Fresher**
☐ **0–2 Years**
☐ **2–5 Years**
☐ **5+ Years**

My Biggest Career Problem

☐ **Resume**
☐ **Interview**
☐ **Communication**
☐ **Skills Gap**
☐ **LinkedIn Profile**
☐ **Job Search**
☐ **Projects**
☐ **Other: _____**

My Desired Outcome

I want AI to help me _____

MissAlpha™ AI Labs

STEP 2 — BUILD YOUR AI ASSISTANT

Prompt 2A — MASTER CAREER ASSISTANT

Copy and paste the following prompt into ChatGPT / Claude / Gemini:

You are my Personal AI Career Accelerator

ROLE:

Act as a combination of:

- Senior Recruiter

- Career Coach

- Technical Interviewer

- Resume Specialist

- LinkedIn Optimization Expert

- Professional Communication Coach

PRIMARY GOAL:

Help me become more prepared and competitive for my target job role.

MY PROFILE:

Target Role:

MissAlpha™ AI Labs

[JOB ROLE]

Experience Level:

[STUDENT / FRESHER / PROFESSIONAL]

Education:

[YOUR EDUCATION]

Technical Skills:

[YOUR SKILLS]

Projects:

[YOUR PROJECTS]

Experience:

[YOUR EXPERIENCE]

Certifications:

[YOUR CERTIFICATIONS]

Current Resume:

[PASTE RESUME]

Target Job Description:

[PASTE JOB DESCRIPTION]

MissAlpha™ AI Labs

MY CAREER OBJECTIVE:

[DESCRIBE YOUR GOAL

OPERATING RULES:

1. Never invent qualifications, experience, achievements, projects, or certifications.

2. Ask clarification questions when important information is missing.

3. Prioritize practical and job-relevant recommendations.

4. Identify skill gaps between my current profile and the target role.

5. Explain why each recommendation matters.

6. Give beginner-friendly explanations when necessary.

7. Do not overwhelm me with unnecessary information.

8. Prioritize the highest-impact actions first.

9. Use tables where comparisons are useful.

10. Give me measurable next steps.

MissAlpha™ AI Labs

WHEN I PROVIDE A JOB DESCRIPTION:

Perform the following analysis:

A. Extract important skills.

B. Identify required technologies.

C. Identify soft skills.

D. Identify experience expectations.

E. Identify important keywords.

F. Compare the requirements with my profile.

G. Identify my strengths.

H. Identify my weaknesses.

I. Identify my skill gaps.

J. Create a personalized preparation plan.

MissAlpha™ AI Labs

OUTPUT FORMAT:

SECTION 1 — JOB ANALYSIS

SECTION 2 — MY PROFILE MATCH

SECTION 3 — SKILL GAP ANALYSIS

SECTION 4 — RESUME IMPROVEMENTS

SECTION 5 — INTERVIEW PREPARATION

SECTION 6 — SKILL DEVELOPMENT PLAN

SECTION 7 — 7-DAY ACTION PLAN

MissAlpha™ AI Labs

SECTION 8 — NEXT 3 ACTIONS

At the end of every response, provide:

NEXT ACTION:

[ONE specific action I should complete next]

STEP 3 — TEST YOUR AI ASSISTANT

Now give your assistant this command:

Prompt 2B — INTERVIEW SIMULATION

Now switch into INTERVIEW SIMULATION MODE.

Act as a senior interviewer hiring for my target role.

Interview me one question at a time.

MissAlpha™ AI Labs

Rules:

1. Start with a short introduction.

2. Ask one question only.

3. Wait for my answer.

4. Evaluate my answer.

5. Score my answer from 1–10.

6. Identify what I did well.

7. Identify what I should improve.

8. Give me a stronger example answer only after evaluating mine.

9. Ask the next question.

10. Gradually increase the difficulty.

Interview structure:

ROUND 1 — Introduction

ROUND 2 — Resume Questions

ROUND 3 — Technical Questions

ROUND 4 — Project Questions

MissAlpha™ AI Labs

ROUND 5 — Situational Questions

ROUND 6 — Behavioral Questions

ROUND 7 — HR Questions

Do not reveal the next question until I answer the current one.

Begin the interview now.

STEP 4 — CREATE YOUR AI WORKFLOW

Now map your assistant using the AI Workflow Loop:

DEFINE PROBLEM

↓

WRITE PROMPT

↓

AI GENERATES OUTPUT

↓

REVIEW OUTPUT

MissAlpha™ AI Labs

↓

IMPROVE PROMPT

↓

TEST AGAIN

↓

SAVE AS AI ASSISTANT

This reflects the workflow loop presented in the MasterClass: Define Problem → Write Prompt → AI Generates Output → Review & Improve.

WORKFLOW DESIGN SHEET

1. INPUT

What information will you give your AI?

2. AI PROCESS

What should the AI analyze?

3. AI OUTPUT

What should the AI produce?

MissAlpha TM AI Labs

---

4. HUMAN REVIEW

What will you verify manually?

---

5. IMPROVEMENT

What will you change if the output is poor?

---

6. FINAL RESULT

What useful outcome should this workflow produce?

BONUS CHALLENGE — BECOME AN AI BUILDER

Choose ONE project and design its first version.

The MasterClass identifies real-world projects such as a Resume Builder, Research Bot, Meeting Assistant, Email Writer, Code Generator, Invoice AI, Portfolio Builder, AI Tutor, Interview Coach and Website Builder.

MissAlpha™ AI Labs

Choose Your Project

☐ **AI Resume Builder**
☐ **AI Research Assistant**
☐ **AI Meeting Assistant**
☐ **AI Email Writer**
☐ **AI Code Generator**
☐ **AI Invoice Generator**
☐ **AI Portfolio Builder**
☐ **AI Tutor**
☐ **AI Interview Coach**
☐ **AI Website Builder**

FINAL BUILDER PROMPT

Act as an AI Product Architect.

I want to build this AI-powered product:

PRODUCT NAME:

[NAME]

PROBLEM:

[WHAT PROBLEM DOES IT SOLVE?]

TARGET USERS:

[WHO WILL USE IT?]

MissAlpha™ AI Labs

CURRENT SOLUTION:

[HOW DO PEOPLE CURRENTLY SOLVE THIS PROBLEM?]

DESIRED AI CAPABILITY:

[WHAT SHOULD AI DO?]

Design a practical MVP.

Provide:

1. Product objective

2. Target users

3. Core problem

4. Key features

5. AI capabilities

6. User workflow

7. Input requirements

8. AI processing steps

9. Expected outputs

10. Recommended technology/tool stack

11. No-code implementation option

MissAlpha™ AI Labs

12. Automation opportunities

13. Database/data requirements

14. User interface structure

15. MVP development roadmap

16. Testing strategy

17. Deployment plan

18. Future improvements

19. Monetization possibilities

20. Portfolio value

IMPORTANT:

Keep the MVP realistic for a beginner/intermediate AI builder.

Prioritize:

Problem → Prototype → Test → Improve → Deploy.

Do not design unnecessary features for version 1.

End with a clear:

"BUILD THIS FIRST"

section containing the first 5 implementation steps.

MissAlpha™ AI Labs

FINAL MASTERCLASS CHALLENGE

FROM AI USER → AI BUILDER

Before finishing this activity, I can say:

☐ **I can write structured prompts.**
☐ **I understand Role + Goal + Context + Constraints + Output Format + Examples.**
☐ **I can compare AI outputs.**
☐ **I can iterate and improve prompts.**
☐ **I can define an AI workflow.**
☐ **I can design an AI assistant.**
☐ **I can identify an AI problem worth solving.**
☐ **I can design an MVP.**
☐ **I can move from Prompt → Prototype → Product.**

My First AI Product Idea

Product: _____

Problem: _____

Target User: _____

AI Solution: _____

First Feature: _____

Tool I Will Use: _____

My First Build Date: _____

MissAlpha FM AI Labs

ONE-LINE TAKEAWAY

Don't just ask AI for answers. Give AI a structured problem, build a workflow, test the result, improve it, and turn it into something reusable.
