Generate IF, IFS, AND, OR and Nested IF formulas.

Create formulas to classify:

- High Revenue
- Medium Revenue
- Low Revenue

Also create a Performance Rating column.

Explain every formula.

Prompt 4 – Date Formula Generator

Generate Excel formulas using:

YEAR

MissAlpha_AILabs

MONTH

DAY

TEXT

TODAY

EOMONTH

NETWORKDAYS

WEEKDAY

Quarter

Financial Year

Explain practical business use cases for each formula.

Prompt 5 – Dynamic Dashboard Formula Generator

Generate all Excel formulas required for an interactive executive dashboard.

Include:

Total Revenue

Average Revenue

Total Orders

Units Sold

Average Discount

MissAlpha_AILabs

Top Region

Top City

Top Product Category

Highest Revenue Month

Revenue Growth

Explain every formula.

Prompt 6 – SUMIFS & COUNTIFS Expert

Generate SUMIFS, COUNTIFS and AVERAGEIFS formulas.

Analyze:

Revenue by Region

Revenue by City

Revenue by Product Category

Revenue by Payment Mode

Revenue by Customer Age Group

Explain every formula.

Prompt 7 – Dynamic Array Formula Generator

Generate Excel Dynamic Array formulas using:

FILTER

MissAlpha_AILabs

UNIQUE

SORT

SORTBY

SEQUENCE

TAKE

DROP

Create examples using this retail dataset.

Prompt 8 – Formula Optimization

Review this workbook.

Suggest faster and more efficient formulas.

Replace complex formulas with better alternatives.

Explain why your solution is more efficient.

Prompt 9 – Formula Error Detection

Review every formula in this workbook.

Identify:

#DIV/0!

#VALUE!

#N/A

MissAlpha_AILabs

#REF!

Suggest corrected formulas.

Explain the errors in simple English.

Prompt 10 – AI Formula Tutor

Explain every Excel formula used in this workbook.

For each formula explain:

Purpose

Syntax

Arguments

Business Use Case

Example

Common Mistakes

Best Practices

📊 Part 2 – Interactive Dashboard AI Prompts (10)

Prompt 11 – Dashboard Planner

Design a professional executive retail sales dashboard.

MissAlpha_AILabs

Suggest:

Dashboard Layout

KPI Cards

Charts

Filters

Color Theme

Business Insight Section

Explain why each visual should be used.

Prompt 12 – KPI Generator

Suggest the best KPI cards.

Include:

Total Revenue

Profit

Orders

Units Sold

Average Revenue

Average Discount

Profit Margin

MissAlpha_AILabs

Top Region

Top Category

Top City

Explain the business importance of every KPI.

Prompt 13 – Best Visuals

Recommend the best Power BI and Excel charts.

For every chart provide:

Chart Name

Columns Required

Business Question

Business Insight

Why this chart is recommended.

Prompt 14 – Pivot Table Generator

Generate professional Pivot Tables.

Include:

Revenue by Region

Revenue by Category

Revenue by City

MissAlpha_AILabs

Revenue by Month

Revenue by Payment Mode

Revenue by Customer Age Group

Explain every Pivot Table.

Prompt 15 – Executive Business Insights

Analyze this retail dataset.

Generate:

20 Business Insights

Top Opportunities

Top Risks

Weak Areas

Business Recommendations

Explain everything in simple English.

Prompt 16 – AI Dashboard Reviewer

Review my dashboard.

Suggest improvements for:

Colors

Layout

MissAlpha_AILabs

Fonts

Spacing

Alignment

Visual Selection

Professional Appearance

Explain why each suggestion improves usability.

Prompt 17 – Interactive Slicers

Recommend the best slicers.

Include:

Date

Region

City

Store Type

Product Category

Payment Mode

Customer Age Group

Quarter

MissAlpha_AILabs

Explain where each slicer should be placed.

Prompt 18 – Executive Summary Generator

Create a professional executive summary.

Include:

Overall Performance

Sales Trend

Customer Behaviour

Product Performance

Regional Performance

Business Recommendations

Suitable for CEO presentation.

Prompt 19 – Dashboard Storytelling

Explain this dashboard as if presenting it to senior management.

Create a 5-minute presentation script.

Explain every chart.

Highlight business insights.

Suggest strategic decisions.

Prompt 20 – Complete Dashboard Generator

MissAlpha_AILabs

Act as a Senior Data Analyst.

Using this retail dataset:

Design a professional dashboard.

Generate KPI Cards.

Suggest Charts.

Recommend Pivot Tables.

Generate Business Insights.

Prepare an Executive Summary.

Recommend Dashboard Improvements.

Explain every step.
