

By MissAlph AI_Lab

Practical Claude Activities — From Daily Productivity to Automation

The goal is not to automate everything. The goal is to automate the right things.

The progression is intentionally:

PLAN → ORGANIZE → TRACK → COACH → SELL → CREATE → COMMUNICATE → SCHEDULE → AUTOMATE → BUILD YOUR PERSONAL AI WORKFLOW

ACTIVITY 1 — 🗓️ Build Your Daily Routine Planner

Objective

Turn Claude into a personal daily planning assistant.

What participants provide

- Wake-up time
- Work/college hours
- Commute time
- Personal responsibilities
- Exercise time
- Learning goals
- Important tasks
- Preferred sleep time

Prompt

Act as my Personal Productivity Coach and Daily Routine Planner.

I want you to create a realistic daily routine that helps me manage my work, learning, health, personal responsibilities, and rest without creating an unrealistic or overloaded schedule.

MY DETAILS:

- Wake-up time: [TIME]

MissAlpha_AILaps

- Sleep time: [TIME]
- Work/college hours: [TIME]
- Commute time: [TIME]
- Fixed responsibilities: [LIST]
- Important tasks today: [LIST]
- Learning goal: [GOAL]
- Exercise requirement: [TIME]
- Personal/family responsibilities: [LIST]

Your task:

1. Analyze my available time.
2. Separate fixed activities from flexible activities.
3. Prioritize my tasks using Urgent / Important / Optional.
4. Create a time-blocked daily schedule.
5. Add short breaks between demanding activities.
6. Include focused work/study blocks.
7. Include exercise and personal time.
8. Include buffer time for unexpected tasks.
9. Avoid scheduling too many difficult tasks consecutively.
10. Protect my sleep time.

Create the output in this format:

A. Today's Top 3 Priorities

B. Time-Blocked Schedule

C. Important Tasks

D. Quick Tasks

MissAlpha_AILaps

E. Breaks & Recovery

F. What I Should Avoid Today

G. End-of-Day Success Checklist

Do not create a perfect-looking schedule that is impossible to follow. Optimize for realism, consistency, and productivity.

At the end, ask me 3 questions that would help you improve tomorrow's schedule.

Challenge

Now create a second version of this schedule assuming I lose 2 hours unexpectedly.

Keep the most important tasks and remove or postpone low-value activities.

Learning

Prompting + prioritization + time management

ACTIVITY 2 — Personal Fitness & Habit Planner

Objective

Show how Claude can turn personal goals into a structured routine.

For safety, this activity should be presented as a **general planning exercise**, not medical or individualized medical advice.

Copy-Paste Prompt

Act as a general fitness planning assistant.

MissAlpha_AILaps

Help me create a realistic weekly fitness and healthy-habit routine based on my goals, schedule, current activity level, preferences, and available equipment.

MY GOAL:

[Example: improve general fitness / become more active / build consistency]

MY CURRENT ACTIVITY LEVEL:

[Beginner / Intermediate / Advanced]

AVAILABLE EQUIPMENT:

[LIST]

DAYS AVAILABLE:

[LIST]

TIME AVAILABLE PER SESSION:

[MINUTES]

PREFERENCES:

[Walking / strength / yoga / cycling / etc.]

CONSTRAINTS:

[Travel / work schedule / limited equipment / etc.]

Create:

1. A 7-day activity schedule.

MissAlpha_AILaps

2. A daily movement target.

3. Exercise-session structure.

4. Rest/recovery days.

5. A simple habit checklist.

6. A weekly progress tracker.

7. A consistency score.

8. A plan for days when I have very little time.

Do not diagnose medical conditions or make medical claims.

If I mention an injury, medical condition, medication, pain, or other health concern, tell me that I should consult an appropriate qualified healthcare professional instead of giving medical treatment advice.

Keep the plan practical and sustainable rather than extreme.

Advanced Challenge

Now create a 30-day habit tracker based on this plan.

Include:

- Daily activity
- Water/hydration habit
- Sleep target
- Exercise completion
- Mood/energy rating
- Weekly review

Make the tracker simple enough that I can actually maintain it every day.

Learning

MissAlpha_AILaps

Planning + tracking + habit systems

MissAlpha_AILaps

ACTIVITY 3 — 🚀 Build Your Personal AI Life & Work Command Center

Objective

Your final challenge is to create a **Personal AI Command Center**."

Copy-Paste Master Prompt

Act as my Personal AI Chief of Staff.

Your role is to help me organize my goals, daily tasks, learning, career, communication, meetings, projects, and productivity.

MY PROFILE:

- Name: [NAME]

- Current role: [ROLE]

- Main goals: [GOALS]

- Work/college responsibilities: [DETAILS]

- Learning goals: [DETAILS]

- Career goals: [DETAILS]

- Personal goals: [DETAILS]

- Major projects: [PROJECTS]

- Common repetitive tasks: [TASKS]

- Tools I use: [TOOLS]

- Typical working hours: [TIME]

I want you to help me build a structured Personal AI Command Center.

Create the following modules:

MODULE 1 — DAILY PLANNER

Create my daily priorities and time blocks.

MissAlpha_AILaps

MODULE 2 — TASK MANAGER

Organize tasks by:

Urgent

Important

Can Wait

Delegate

Automate

MODULE 3 — GOAL TRACKER

Track my short-term and long-term goals.

MODULE 4 — LEARNING COACH

Create learning plans and practice activities.

MODULE 5 — CAREER COACH

Track skills, projects, portfolio development, and career actions.

MODULE 6 — EMAIL ASSISTANT

Help draft, summarize, classify, and improve professional communication.

MODULE 7 — MEETING ASSISTANT

Help prepare meeting agendas, questions, action items, and follow-ups.

MODULE 8 — CALENDAR PLANNER

Help organize tasks around my available calendar time.

MODULE 9 — AUTOMATION FINDER

MissAlpha_AILaps

Identify repetitive tasks that could potentially be automated.

MODULE 10 — WEEKLY REVIEW

Analyze my week and recommend improvements.

For every module:

1. Explain what information I need to provide.
2. Define what Claude should do.
3. Define the expected output.
4. Identify what I should verify.
5. Identify what could potentially be automated.

Create a simple command system.

For example:

/today = create today's plan

/tasks = organize my tasks

/goals = review my goals

/learn = create my learning plan

/career = review my career progress

/email = help with email

/meeting = prepare for a meeting

/calendar = organize my schedule

/automate = identify automation opportunities

/review = conduct my weekly review

MissAlpha_AILaps

Keep the system simple enough for daily use.

Do not overwhelm me with unnecessary complexity.

Prioritize practical actions, clarity, consistency, and time savings.

BONUS: FINAL AUTOMATION CHALLENGE

After Claude creates the Command Center, enter:

Now analyze everything in my Personal AI Command Center.

Identify my 10 most repetitive tasks.

Rank them from highest to lowest automation potential using:

- *Frequency*
- *Time consumed*
- *Predictability*
- *Complexity*

MissAlpha_AILaps

- Risk

- Human judgment required

Then create an Automation Priority Matrix:

DO NOW

DO NEXT

AI-ASSIST

KEEP MANUAL

For each task, explain why you placed it in that category.

Finally select ONE task and design a detailed workflow:

TRIGGER

↓

INPUT

↓

CLAUDE

↓

PROCESS

↓

DECISION

↓

ACTION

↓

OUTPUT

↓

VERIFY

MissAlpha_AILaps

Keep human approval wherever the decision is important or potentially risky.

---

5 Ways to Work Smarter with Claude + Selected Claude Skills

Simple → Practical → Advanced → Automation

PART 1 — THE 5 WAYS

Way	What it means	Best for
1. Normal Prompting	Ask Claude directly	Quick answers, ideas, writing
2. Projects	Give Claude a dedicated workspace	Ongoing work with files/context
3. Artifacts	Ask Claude to create something usable	Trackers, planners, tools, documents
4. Connectors	Connect Claude with your apps/data	Calendar, Gmail, Drive, etc.
5. Plugins / ready-made workflows	Use ready-made workflows	Skills, connectors, sub-agents

MissAlpha_AILaps

WAY 1 — NORMAL PROMPTING

Normal Prompting = Just ask Claude what you need.

You don't need a complicated setup.

COPY-PASTE PROMPT

Act as my Weekly Planning Assistant.

I want to plan my week.

MY TASKS:

[PASTE YOUR TASKS]

MY MEETINGS:

[PASTE YOUR MEETINGS]

MY DEADLINES:

[PASTE YOUR DEADLINES]

MY PERSONAL ACTIVITIES:

[PASTE YOUR PERSONAL ACTIVITIES]

MY GOALS:

[PASTE YOUR GOALS]

Create a realistic weekly plan.

Please:

1. Identify my top priorities.

2. Organize my tasks by priority.

3. Suggest time blocks.

4. Identify urgent deadlines.

5. Add breaks.

6. Leave some buffer time.

MissAlpha_AILaps

7. Avoid overloading my day.

Give me:

A. Top 5 priorities

B. Weekly schedule

C. Important deadlines

D. Tasks I can postpone

E. Tasks I can delegate or automate

Best use

Quick planning → Quick answers → Quick ideas

WAY 2 — PROJECTS

Projects = Give Claude a dedicated workspace with files, instructions and ongoing context.

Instead of explaining everything repeatedly, keep relevant information together.

Example

Create a Project called:

MY CAREER PROJECT

Add:

- Resume
- Job descriptions
- Certificates
- Projects
- Portfolio information
- Career goals

COPY-PASTE PROMPT

Act as my Career Project Assistant.

MissAlpha_AILaps

Use the information and files available in this Project.

My target role is:

[TARGET ROLE]

My target industry is:

[INDUSTRY]

Help me understand my current position.

Please:

1. Review my information.

2. Identify my strengths.

3. Identify my skill gaps.

4. Compare my profile with my target role.

5. Suggest projects I should build.

6. Create a 30-day learning plan.

7. Create a 60-day project plan.

8. Create a 90-day career action plan.

Do not invent any experience, skills or achievements.

Give me specific actions I can take.

Normal Chat = Ask Claude.
Project = Work with Claude continuously.

MissAlpha_AILaps

WAY 3 — ARTIFACTS

Artifacts = Ask Claude to create something usable and interactive.

Instead of receiving only an answer, ask Claude to **build a tool**.

Examples:

- Weekly planner
- Task tracker
- Habit tracker
- Dashboard
- Checklist
- Interactive learning tool
- Calculator
- Workflow

COPY-PASTE PROMPT — WEEKLY PLANNER

Create an interactive Weekly Planner for me.

Include:

MissAlpha_AILaps

1. Monday to Sunday

2. Daily tasks

3. Priority

4. Deadline

5. Status

6. Progress

7. Notes

Add a simple progress tracker.

Keep the design clean and easy to use.

Make it practical enough for daily use.

Then ask:

Now improve the planner.

Add:

- Completed / Pending status
- Priority levels
- Progress percentage
- Weekly summary
- Space for notes

Keep it simple.

Prompting gives you an answer.
Artifacts can turn the answer into something you can use.

MissAlpha_AILaps

WAY 4 — CONNECTORS

Connectors = Bring real-world information from your apps into Claude.

Examples shown in the masterclass material include:

- Google Calendar
- Gmail
- Google Drive

The exact capabilities depend on what is connected and available in the participant's Claude setup.

COPY-PASTE PROMPT — CALENDAR PLANNING

Act as my Executive Assistant.

Use my connected calendar information to help me plan my week.

Please:

1. Review my meetings.

2. Identify available time blocks.

3. Find my busiest days.

4. Identify conflicts.

5. Find suitable focus-work blocks.

6. Suggest where I can complete my highest-priority tasks.

Do not make any calendar changes.

First show me the proposed schedule in a table.

Advanced step

Now use my available calendar time and suggest the best

time blocks for my highest-priority tasks.

MissAlpha_AILaps

Before making any changes, show me the proposed changes.

Do not create or modify calendar events unless I explicitly approve.

Important concept

> **AI planning → Human approval → Calendar action**

This distinction is particularly important when AI interacts with real-world systems.

MissAlpha_AILaps

WAY 5 — PLUGINS / READY-MADE WORKFLOWS

Use ready-made workflows when you don't want to build everything from scratch.

The masterclass material describes this approach using **skills + connectors + sub-agents** for specific tasks.

Simple example

Instead of asking Claude:

"How should I write a LinkedIn post?"

Use a relevant ready-made skill/workflow.

MissAlpha_AILaps

PART 2 — CLAUDE SKILLS: HOW TO USE THEM

SKILL → WHEN TO USE → SIMPLE COMMAND → EXAMPLE

SKILL 1 — My Viral LinkedIn Post

Use when:

You want Claude to draft a LinkedIn post in your preferred style.

Command

/my-viral-post

Example

Create a LinkedIn post about:

Topic:

[TOPIC]

Audience:

[WHO SHOULD READ IT]

Main lesson:

[LESSON]

Make it professional, useful and easy to read.

MissAlpha_AILaps

SKILL 2 — How-to

Use when:

You want Claude to explain how to complete a task.

Command

/how-to

Example

Explain how to create a professional LinkedIn profile.

Give me:

1. Step-by-step instructions

2. What to write

3. Common mistakes

4. A final checklist

Keep the explanation simple.

SKILL 3 — Infographic Builder

Use when:

You want to convert information into an infographic structure.

Command

/infographic-builder

Example

Create an infographic about:

Topic:

MissAlpha_AILaps

[TOPIC]

Audience:

[AUDIENCE]

Include:

- Title

- 5 key points

- Short explanations

- Visual/icon suggestions

- Final takeaway

Keep the content short and visually organized.

SKILL 4 — Deep Research Analyzer

Use when:

You want Claude to analyze and synthesize information from sources.

Command

/deep-research-synthesizer

Example

Research and analyze:

TOPIC:

[TOPIC]

I want to understand:

1. Key findings

MissAlpha_AILaps

2. Important facts

3. Different viewpoints

4. Practical implications

5. Sources

Separate facts from assumptions.

Give me a concise final summary.

SKILL 5 — Deck Builder

Use when:

You want to plan/build presentation content.

Command

/deck-builder

Example

Create a presentation structure about:

TOPIC:

[TOPIC]

AUDIENCE:

[AUDIENCE]

TIME:

[MINUTES]

Create:

1. Title slide

2. Learning objectives

MissAlpha_AILaps

3. Main content

4. Examples

5. Practical activity

6. Summary

7. Call to action

Keep each slide simple and presentation-friendly.

MissAlpha_AILAB_Apps

MissAlpha_AILaps
